

# Westchester

## Municipal Sustainability Conference

# SAVE THE DATE: APRIL 1, 2021

**“There is no greater power than a community discovering what it cares about.” - Margaret Mead**

It is the strength and commitment of every municipality that will help to create a more resilient, and environmentally sound and just Westchester.

Westchester County and its partners, Sustainable Westchester and the Federated Conservationists of Westchester County invite all municipal Conservation Advisory Council, Community Environmental/Sustainability/Green and Climate Action groups as well as elected officials and municipal planning/zoning/public works and parks & recreation staffs to join us.

This three-hour event will give us the opportunity to highlight accomplishments, share challenges, and learn from each other in order to reach across the County and lift up each other. As a group, we can also tackle some of the questions and challenges that face us as we work toward creating a more sustainable future for Westchester County.

As you can see and imagine this is a work in progress but do **Save the Date**; you won't want to miss the chance to kick-off Earth Month and:

- 🌟 Hear from other municipal committees and county-wide organizations about solutions/policies & initiatives to help your community reach its climate & sustainability goals
- 🌟 Present your own municipality's successes, challenges, or areas of focus
- 🌟 Meet & network with colleagues across the County
- 🌟 Attend one of a many breakout sessions to dig deeper into your community's area of interest

We invite you to share this invitation with your committee members and colleagues so that they can SAVE THE DATE

A short pre-event survey will follow that will allow us to better shape the conversation

Further event details to follow as well

**Follow-up communication will include all the details, so please sit tight, but questions can be directed to [SustainableConference@WestchesterGov.com](mailto:SustainableConference@WestchesterGov.com)**
